DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 31-81 is now canceled based on the non-elected claims dated 9/12/2005.

Response to Arguments

2. The applicant's argument that Huang et al. failed to disclose a method of manufacturing an electrode, comprising the steps of mixing dry carbon and dry binder particles, and forming a self-supporting film from the dry particles without the use of any processing additives. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.

Allowable Subject Matter

3. Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-28, the prior art alone or in combination does not teach the limitation of a process for manufacturing an electrode for use in an energy storage device product, the process comprising the steps of:

- supplying dry carbon particles;
- supplying dry binder;

- dry mixing the dry carbon particles any dry binder; and
- dry fibrillizing the dry binder to create a matrix within which to support the dry carbon particles as a dry material.

With respect to claims 29-30, the prior art alone or in combination does not teach the limitation of a method of manufacturing an electrode, comprising the steps of mixing dry carbon and dry binder particles, and forming a self-supporting film from the dry particles without the use of any processing additives.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Ohya et al. (US 6,377,441) disclose electric double-layer capacitor with collectors of two or more stacked collector sheets.

b. Amatucci et al. (US 6,187,061) disclose supercapacitor structure and method of making the same.

c. Avarbz et al. (US 6,110,335) disclose electrode having a carbon material with a carbon skeleton network and a capacitor having the same.

d. Hirahara et al. (US 6,094,338) disclose electric double layer capacitor.
